SEES COSMIC RAYS AS FUTURE ENERGY

Professor Piccard Says Power Will Cost Little.

Washington.—Cosmic rays may be the energy of the future, harnessed energy which will light cities, motivate industries and drive airplanes through the stratosphere at tremendous speeds, Prof. August Piccard, the Swiss physicist who ascended ten miles in a balloon, told an audience in the Washington auditorium in his first lecture in this country.

Speaking before the National Geographic society, the famous stratosphere explorer said it is "high time" man should be preparing to replace the earth's dwindling coal supplies with a new source of energy, which he believes will be the cosmic rays, which shower continuously on the earth from the sky.

"The transformation of the atoms of three drops of water," he said, "would produce enough cosmic rays and enough energy and motor power to light up the whole city of Washington through a whole night."

Cosmic rays are produced by a "modification of atoms" not yet understood, he explained, which releases tremendous energy, and "when we are able to manufacture these rays artificially on earth we will be able to utilize that vast energy, and can snatch out of a handful of air, from a source now invisible, sufficient energy to operate hundreds of high-powered machines."

Cosmic rays are the energy of the future," he added, "and when this source of power is made available, producing limitless energy free, at most, what coal remains in the earth's veins will suddenly become valueless."

The cosmic rays are penetrating like the rays from radium, but a million times more powerful, Professor Piccard said.

U. S. and Germany Plan Economic Co-Operation

Berlin.—A big step forward in the economic co-operation between the United States and Germany has been achieved by a number of important freight pools, closed between North Atlantic shipping companies of both countries.

Agreements were closed between the United States line and the Hapag Lloyd Union, the Baltimore Mail Steam Ship company and the Hamburg-American line, the Yankee line and the Hamburg-American line.

Newspapers here hope the agreements will lead to improvement in the North Atlantic shipping service. The economic importance of the agreements is seen especially in the fact that damaging competition between the shipping companies of both countries will be removed.

Mohammedans Like Mutton

Mutton is the favorite meat of the Mohammedans; therefore, wherever the followers of the prophet congregate in large numbers there is sure to be a sheep market. Nearly all of the desert people are Arabs, Berbers, or members of the smaller nomadic tribes, and virtually to a man they are Moslems. A North Africa sheep market is always sure to attract a host of customers. Many of the natives of that arid region are skillful spinners and weavers, and are capable of producing a fine quality of cloth from the raw wool. They color the cloth with vegetable dyes produced by themselves, the secrets of which they refuse to divulge to foreigners.

COAL!

When thinking about coal I would like to call your attention to the fact that we handle the CELEBRATED D. L. & W. COAL.

Tomorrow CHEVROLET presents

THE WORLD'S LOWEST-PRICED FULL-SIZE SIX-CYLINDER ENCLOSED CARS
A NEW AND ADDITIONAL LINE OF CHEVROLET SIXES

Another great new line of cars from the leader! Tomorrow, Chevrolet introduces, as an addition to its present Master Six, the new Standard Six line. Big, full-size, full-length automobiles. Built to Chevrolet standards of quality... performance... dependability... and economy. And selling at the lowest prices ever placed on six-cylinder enclosed motor cars.

| | |
|------------------------|-------|
| COUPE | \$445 |
| COACH | \$455 |
| COUPE with rumble seat | \$475 |

mission has an easy, clashless shift and a silent second gear. The engine is a smooth, fast, responsive six. And Chevrolet engineers have made economy an outstanding feature! Engineering tests show that the Standard Six goes more miles on a gallon of gas, more on a filling of oil, than will any other full-size car on the road. As for reliability—remember, it's a Chevrolet.

Introduction of this new Standard Six opens the way for new thousands of people to enjoy the advantages of Chevrolet quality. It gives the public, for the first time, a full-size automobile combining maximum quality and maximum all-round economy.

The styling is modern, aer-stream styling... ultra-smart and up-to-the-minute. The bodies are Fisher wood-and-steel bodies—spacious, tastefully finished—and featuring Fisher No Draft Ventilation. The windshields have safety plate glass. The trans-
